

CALIFORNIA STATE BOARD OF EQUALIZATION

HARVEST VALUE SCHEDULES, EFFECTIVE JANUARY 1 THROUGH JUNE 30, 1996 (Adopted by the California State Board of Equalization, November 29, 1995)

INSTRUCTIONS

REPORTING PROCEDURE - Timber tax returns must be reported by the Timber Tax Account Number of the timber owner. The return shall include only timber having the same ownership as shown for the registration of the account.

The Timber Tax Harvest Report is completed first by the taxpayer in order to prepare the Timber Tax Return. The taxpayer must maintain records to report the timber for each timber harvest operation separately as defined below.

TAX RATE - The tax rate for the period of this schedule is 2.9%.

TIMBER HARVEST OPERATION

- A. A harvest on private land for an entire Timber Harvesting Plan, Notice of Timber Operations or Emergency Notice, or a combination of these within the same geographical area, as submitted to the Department of Forestry.
- B. A harvest on public land for an entire timber sale contract between a public agency and a purchaser.

HARVEST VALUE SCHEDULE - The appropriate schedule provides the timber values to be used by the timber owner for preparing the Timber Tax Harvest Report and the Timber Tax Return. Nine timber value areas are designated within the State, and the taxpayer must use the appropriate harvest value schedule for timber harvested within the specified area. Timber value areas are shown on the map, and the boundaries of these areas follow county boundaries with exceptions in Shasta, Siskiyou, Tehama, and Trinity Counties.

SPECIES - Timber species or products are reported by using the appropriate code as shown in the harvest value table. Jeffrey pine is reported as ponderosa pine. Western white pine is reported as sugar pine. Fir and hem/fir include white fir, red fir, grand fir, western hemlock, and Shasta red fir. Miscellaneous conifers include lodgepole pine, knobcone pine, digger pine, mountain hemlock and other evergreen species not listed in the table. Coastal whitewoods in areas 1 and 2 include spruce and western redcedar. Residual old growth redwood in Area 1 is the remaining old growth redwood trees harvested from an area whereon 70 percent or more of the volume in the original stand has been removed. Unsound sapwood logs are to be reported along with the other volumes for a particular species code. Small sawlogs include all species that qualify for this definition as found in the Table 1 instructions.

CULL LOGS - A cull log is any log that, when scaled, shows less than 1/4 of its gross volume as sound, usable lumber. Cull logs are to be reported in adjusted gross M board feet. Unsound sapwood logs are not classified as cull logs.

OLD GROWTH OR YOUNG GROWTH - The taxpayer must report the timber as either old growth or young growth, providing the quantity in each category. The taxpayer shall use the following characteristics to classify volumes for certain species as either old growth or young growth timber. The timber values are based upon this classification and the old growth timber is usually rated for size-quality.

This system is designed for rating standing timber, not logs; therefore, the upper logs of old growth trees shall be placed in the old growth category.

The taxpayer must give full consideration to all of the characteristics of the timber. An individual characteristic, such as age, shall not be used in this classification. The appropriate category shall be selected if a majority of the characteristics appear under that category. It is suggested that this classification be made by a registered

INSTRUCTIONS

professional forester based upon an inventory or a statistical sample of the timber utilizing the given characteristics. If log scalers are used to rate the timber, their rating must also be based on the following characteristics.

Characteristics	<u>Old Growth Timber</u>	<u>Young Growth Timber</u>
Wood	Produces high quality lumber with fewer knots in the lower logs.	Produces lower quality lumber and more knots in lower logs.
Age	Mature and over mature trees 150 years and over, except in the redwood--Douglas-fir areas within TVA 1 and TVA 2 where 100 years shall be the criterion.	Younger trees under 150 years except in the redwood--Douglas-fir areas within TVA 1 and TVA 2 where 100 years shall be the criterion.
Crown Branches	may be downturned and the tops may be rounded or flat.	Branches are usually upturned and the tops are usually pointed.
Bark	Dependent upon species, bark is typical of older mature trees as described in dendrology books.	Dependent upon species, bark is typical of younger trees as described in dendrology books.
Growth	Trees are generally growing increasingly slower as indicated by annual rings. dependent upon position of the tree within the timber stand. Grain usually shows six annual rings or more per inch.	Trees are generally growing fast as indicated by annual rings, dependent upon position of the tree within the timber stand. Grain usually shows less than six annual rings per inch.

SALVAGE TIMBER - Salvage values are used for reporting salvage timber removed from an area designated for salvage logging. Salvage logging may occur whenever the prompt removal of timber is essential to avoid its deterioration. For old growth redwood, salvage logging includes the removal of dead or down trees previously left as unmerchantable in an earlier harvest.

1. Salvage timber includes only dead, dying, damaged or down trees removed from the area of salvage logging.
2. Live, healthy trees removed from the area of salvage logging do not qualify for salvage values.
3. Dead, dying, damaged or down trees should not be reported as salvage timber if they are removed as a part of a normal harvest.

LOGGING SYSTEM - The taxpayer must report the volume of timber harvested by logging system. Logging systems and logging code numbers are as follows: Tractor (includes skidding with winch, endlining) -1, High-lead cable -2, Short-span skyline - 3, Long-span skyline - 4, and Helicopter - 5. Skyline logging settings are classified by the actual external yarding distance on the slope: Short-span has a maximum length of 1500 feet and long-span is over 1500 feet.

VOLUMES - All volumes are net Scribner short-log scale (20 feet maximum scaling length) except where indicated otherwise in Table 1. For national forest timber sold on scaled volume billings, the Forest Service statements of account (billing statement) shall be the basis for tax payment. To convert split products to a board foot basis, multiply the thickness by the width and by the length (all in inches) and divide by 144 ($T'' \times W'' \times L'' / 144 = \text{Board Feet per Piece}$).

INSTRUCTIONS

TABLES - The harvest value schedule for each timber value area has six separate tables to provide the taxpayer with the taxable value of harvested timber. Timber values are shown as a dollar amount per thousand (M) board feet or other unit of measure. Species codes and units of measure are shown in the tables for preparation of the Timber Tax Harvest Report.

VALUE DEDUCTIONS - Low volume harvest may qualify for reduction of harvest values. Volume limits and deduction amounts are shown at the bottom of each of the harvest value tables except Table 1, Miscellaneous Harvest Values, where no deduction is allowed. The small total volume per acre deduction is applicable to all qualified timber harvest operations; however, the low average volume per acre deduction is not applicable to salvage timber. Either or both deductions may be used if the operation meets the applicable limitations. The volume computations are based upon all timber in the total harvest operation without regard to the time of harvesting. The total net volume of all species of timber to be removed on the entire timber harvest operation including small sawlog volume in Table 1, is used to determine whether the operation qualifies for the small total volume deduction. This figure is then divided by the total acres to be cut on the entire timber harvest operation to determine the average net volume per acre.

TIMBER TAX OFFICES - Please contact the Timber Tax Division if you need assistance.

Sacramento - 450 N Street, MIC: 60, Sacramento, CA 95814
P.O. Box 942879, Sacramento, CA 94279-0060
Telephone (916) 445-6964

Eureka - 134 D Street, Suite 303, P.O. Box 4866, Eureka, CA 95502
Telephone (707) 445-6502

Redding - 2400 Washington Avenue, Suite 210, Redding, CA 96001
Telephone (916) 225-2670

PRIVACY NOTICE - INFORMATION FURNISHED THE BOARD OF EQUALIZATION IS HELD CONFIDENTIAL

The Information Practices Act of 1977 requires this agency to provide the following notice to individual taxpayers who are asked by the State Board of Equalization to supply information:

The principal purpose for which the requested information will be used is to administer the California Timber Yield Tax Law. This includes the determination and collection of the correct amount of tax.

An individual taxpayer has the right of access to personal information about himself or herself in records maintained by the State Board of Equalization. The Board official responsible for maintaining Timber Tax Information is the Timber Tax Division Chief, Department of Property Taxes, 450 N Street, Sacramento, CA 95814, Telephone (916) 445-6964.

The California Revenue and Taxation Code, Part 18.5 (Timber Yield Tax), requires individuals and other persons meeting certain requirements to file applications for registration and tax returns in such form as prescribed by the State Board of Equalization.

It is mandatory that such individuals and other persons furnish all the required information requested by applications for registration, tax returns and other related data, except that the furnishing of social security numbers by individual applicants for Timber Yield Tax Accounts is voluntary. In addition, the law provides penalties for failure to file a return, for failure to furnish specific information required, for failure to supply information required by law or regulations, and for furnishing fraudulent information.

Information individuals and other taxpayers furnish to the State Board of Equalization may be given to federal, state and local government agencies as authorized by law.

(MAP PAGE)

CALIFORNIA STATE BOARD OF EQUALIZATION

HARVEST VALUE SCHEDULES, EFFECTIVE JANUARY 1, 1996 THROUGH JUNE 30, 1996 (Adopted by the California State Board of Equalization, November 29, 1995)

TABLE 1, MISCELLANEOUS HARVEST VALUES - This table is applicable to all timber value areas and shows the harvest values for special items such as Christmas trees, fuelwood, chipwood, poles, posts, split products, small sawlogs, and cull logs. Small sawlogs are logs of any species where the average net volume per 16-ft log for all sawlogs removed from a timber harvest operation during the reporting quarter is less than 65 board feet, Scribner Short Log Scale. Cull logs are to be reported in adjusted gross M board feet. For cull logs measured in tons, use a conversion factor of 4 tons per gross MBF, Scribner scale. Except for split products and small sawlogs, the items in this table are to be reported in the column for other unit measure on the Timber Tax Harvest Report.

TABLE 2, SIZE-QUALITY RATING FOR OLD GROWTH - This table shows the log sizes used to rate the listed species of old growth timber. The taxpayer determines the appropriate size-quality code as 1, 2, or 3 based upon the average net volume per 16' log. The average volume per log is for the reported quarterly volume within the harvest operation. It is calculated by dividing the net volume by the actual number of short-log scaling segments. (An estimate of the number of scaling segments may be made by dividing the total linear feet by 16.) Cull logs are excluded from this determination.

TABLE 3, OLD GROWTH HARVEST VALUES - This table shows the harvest values for such timber by species, size-quality if required, and logging system. The taxpayer must make the adjustments for small total volume on the harvest operation and/or low average volume per acre on the harvest operation if the operation qualifies.

TABLE 4, YOUNG GROWTH HARVEST VALUES - This table shows the harvest values for such timber by species and logging system. The taxpayer must make the adjustments for small total volume on the harvest operation and/or low average volume per acre on the harvest operation if the operation qualifies.

TABLE 5, SALVAGE OLD GROWTH HARVEST VALUES - This table shows the harvest values for such timber removed by salvage logging only. The table shows the harvest values by species and logging system. The taxpayer must make the adjustment for small total volume on the harvest operation if the operation qualifies.

TABLE 6, SALVAGE YOUNG GROWTH HARVEST VALUES - This table shows the harvest values for such timber removed by salvage logging only. The table shows the harvest values by species and logging system. The taxpayer must make the adjustment for small total volume on the harvest operation if the operation qualifies.

TABLE 1 - MISCELLANEOUS HARVEST VALUES

SPECIES OR PRODUCT	SPECIES CODE	UNIT	HARVEST VALUE PER UNIT
Cull logs	CUL	Adj. Gross M board feet	5.00
Fuelwood, hardwood	FWH	Cords	20.00
Fuelwood, miscellaneous	FWM	Cords	15.00
Pulp chipwood & hardwood logs	HW	Green Tons	9.00
Woods-produced fuel chips	CS	Bone Dry Tons	0.00
Poles & pilings, small (20'- 40')	PS	Linear feet	.65
Poles & pilings, medium (41'- 60')	PM	Linear feet	1.25
Poles & pilings, large (61'- up)	PL	Linear feet	1.70
Posts, round	PST	8 Linear feet	.20
Split products, redwood	TR	Net M board feet	75.00
Split products, miscellaneous	TM	Net M board feet	10.00
Small sawlogs, miscellaneous	SSM	Net M board feet	200.00

No deduction for this table

HARVEST VALUE SCHEDULES, EFFECTIVE JANUARY 1, 1996 THROUGH JUNE 30, 1996
(Adopted by the California State Board of Equalization, November 29, 1995)

TIMBER VALUE AREA 1

TABLE 2 - SIZE-QUALITY RATING FOR OLD GROWTH

Average Net Volume Per Log (Board Feet)

SPECIES	SIZE - QUALITY CODE		
	1	2	3
Redwood	Over 850	850 - 530	Under 530
Redwood, residual	Over 535	535 - 360	Under 360
Douglas-fir	Over 430	430 - 310	Under 310

TABLE 3 - OLD GROWTH HARVEST VALUES
(Per M Board feet)

	SPECIES	SIZE QUALIT Y	LOGGING CODE AND HARVEST VALUE

1. Deduct \$25 from the harvest values for the following counties: Marin, Monterey, San Mateo, Santa Clara and Santa Cruz.
2. Deduction if total volume on the harvest operation is under 300M -\$50, under 100M -\$100, under 25M -\$150.
3. \$1 per M is minimum harvest value after adjustment.

HARVEST VALUE SCHEDULES, EFFECTIVE JANUARY 1, 1996 THROUGH JUNE 30, 1996
(Adopted by the California State Board of Equalization, November 29, 1995)

TABLE 3 - OLD GROWTH HARVEST VALUES
(Per M Board feet)

	SPECIES	SIZE QUALIT Y	LOGGING CODE AND HARVEST VALUE				
SPECIES	CODE	CODE	1	2	3	4	5
Ponderosa pine	PPO	1	910	900	870	855	770
		2	800	790	760	745	660
		3	675	665	635	620	535
Sugar pine	SPO	1	925	915	885	870	785
		2	825	815	785	770	685
		3	700	690	660	645	560
Fir	FO	-	365	355	325	310	225
Douglas-fir	DFO	1	550	540	510	495	410
		2	500	490	460	445	360
		3	450	440	410	395	310
Incense-cedar	ICO	-	320	310	280	265	180
Conifers, misc.	CMO	-	200	190	160	145	60

1. Deduction if total volume on the harvest operation is under 300M -\$50, under 100M -\$100, under 25M -\$150.
2. Deduction if average volume per acre on the harvest operation is under 5 M/acre -\$25.
3. \$1 per M is minimum harvest value after adjustment.

TIMBER VALUE AREA 8

TABLE 4--YOUNG GROWTH HARVEST VALUES
(Per M Board feet)

SPECIES	SPECIES CODE	LOGGING AND HARVEST VALUE				
		1	2	3	4	5
Ponderosa pine	PPY	510	500	470	455	370
Sugar pine	SPY	510	500	470	455	370
Fir	FY	320	310	280	265	180
Douglas-fir	DFY	400	390	360	345	260
Incense-cedar	ICY	275	265	235	220	135
Conifers, miscellaneous	CMY	175	165	135	120	35

1. Deduction if total volume on the harvest operation is under 300M -\$50, under 100M -\$100, under 25M -\$150.
2. Deduction if average volume per acre on the harvest operation is under 5 M/acre -\$25.
3. \$1 per M is minimum harvest value after adjustment.

TABLE 5--SALVAGE OLD GROWTH HARVEST VALUES
(Per M Board feet)

SPECIES	SPECIES CODE	LOGGING AND HARVEST VALUE				
		1	2	3	4	5
Salvage ponderosa pine	ZPP	515	505	475	460	375
Salvage sugar pine	ZSP	515	505	475	460	375
